MAKERS AND STUDENTS IN MEDICINE, NURSING, PHARMACY AND
OTHER HEALTH SCIENCES.**

2018 - 2020

VISION

- We inspire and enable a better world through our teaching, training, community engagement and translational research programs.

Missions & Values

To strategically use "Education" for processing "Information" into "Knowledge" in order to enable the creation of innovative and intellectual services and products that can yield profits for individuals and businesses, hence generate "Knowledge Economy".

To build a vibrant and supportive community of scholars by markedly expanding opportunities to connect and explore ideas is the Academy's motive for existence.

To support the African continent in its mandate of achieving the Sustained Development Goals by advancing sciences, innovation and entrepreneurship.

What is the Academy's profile?

Headquartered in Durban - South Africa, the Southern African Training Academy, SATA Group PTY LTD, is a platform established in September 2013.

SATA is registered under the Companies and Intellectual Property Commission of the Republic of South Africa, bearing the registration number [K2013/160670/07 PTY LTD](#) in terms of section 14 of the Companies Act, 2008.

SATA Publishers!

We aim to become the Africa's leading scientific publisher by 2025 through developing the highest quality knowledge-based products and services for the academic, scientific, professional, research and student communities.

We also produce and distribute authors' text books and e-books using our online book store. As such, SATA is dedicated to the more efficient and quick distribution of new knowledge at affordable prices. We currently have one internationally accredited scientific journal "**JOURNAL OF INNOVATION & RESEARCH IN HEALTH SCIENCES AND BIOTECHNOLOGY**" (JIRESH-Biotech).

The Journal of Innovation and Research in Health Sciences and Biotechnology (JIRESH-Biotech) is a peer-reviewed, open access journal that quarterly publishes original research articles, systematic review articles, short communications, case studies, meta analyses, and experimental studies on all innovative and novel aspects of health sciences and biotechnology (ISSN 2414-1593 and ISSN 2413-7669 for print and online versions respectively).

Please visit our website at <https://www.satagroup.org/> and click on "Scientific Journals".

SATA Education!

Truth be told, we have since gone through a major change with several technological waves. The world has embarked into a “knowledge economy” whereby entrepreneurship became core to our success. Despite this critical change, our current education system neither evolves nor adapts. It became clearly obsolete.

In addition, State education budgets worldwide are shrinking, while businesses’ expectations for job preparedness are ever rising. [SATA Education is stepping in to help close the gap.](#)

SATA CONSULTING!

We have proven a multiplier effect from optimizing the sum of the parts. We had accumulated numerous years of expertise in quality healthcare and total quality management.

Our consulting services focus on our clients' most critical issues and opportunities: strategy, marketing, organization, quality improvement, operations, technology, corporate finance transformation and sustainability across all industries including healthcare sector.

The famous old school statement: “It takes money to make money” is no more valid. In the contrary, it takes a passionate idea to make money and all riches begin within your own minds!

SATA Entrepreneurs!

It breaks the heart to see highly educated middle-class employees working extremely hard for money. The harder they work, the poorer they become. The very same thing that they are working hard to acquire enslaves them because they lack financial education! They are trapped in debts because they call liability an asset. Join SATA Entrepreneurs' Community to enjoy life of financial freedom.

SATA Conferences!

We are a growing scientific event production and management company and still welcoming new contributors and partners since we thrive to become the Africa's leading scientific conference organiser by 2025.

We specialise in the production, organisation and management of congresses, conferences, seminars and similar events.
